

# Westfield Stud

Our aim has to been to breed large ponies and small hacks, nice solid hunter types, that are versatile and suitable for all levels of riders. We enjoyed breeding with our stallion John Brodie since 2007. Being homozygous, John Brodie is a guaranteed 100% colour producer and his foals continue to be everything we could have wished for.

John is a traditional gypsy cob, imported from the England in 2006. He measures 146cm, has 10" bone, and is homozygous for the tobiano and black genes. He is very much true to type of a traditional gypsy cob, a super natured horse with good bone, and a guaranteed colour producer to top it off. He is very versatile, and loves all aspects of riding, whether it be jumping, dressage, hacking out or playing games. John has left his stamp on his foals leaving bone, substance and trainable temperaments. Service fee in New Zealand \$800 LFG. Fresh/chilled/frozen semen available. We also have frozen semen available in Australia, please contact us for details
